## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 19 May 2003 has been entered.

### *Specification*

2. The current status of U.S. Applications 09/187,579 and 09/420,569 needs to be updated.

### *Double Patenting*

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claims 1, 2, 4, 6, 7, 10, 11, 12, 13, 14, 15, 21, 22, 23, and 24 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1, 2, 3, 4, 5, 8, 9, 10, 11, 12, 15, 22, 23, 24, and 19, respectively of prior U.S. Patent No. 6,246,062. This is a double patenting rejection.

5. Claim 20 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 19 of U.S. Patent No. 6,548,818 B1. This is a double patenting rejection.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 3, 5, 8, 9, 16-17 and 18-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-2, 4, 7, 12, and 15-16 of U.S. Patent No. 6,246,062. Although the conflicting claims are not identical, they are not patentably distinct from each other because: the specific recitation that a reflective element is integral with the container (claim 3); the specific recitation of the source as being a pulsed source (claim 5); the specific recitation that the processor includes the use of a lookup table or neural network (claims 8-9); the specific recitation that the detector is a spectrometer including a filter (claims 16-17); and the specific identification of a plurality of detectors as including a specific range of 1-100 detectors or 1-20 detectors (claims 18-19) are well known as functionally equivalent and/or otherwise routine variations, alternative arrangements, or optimal design choices that are typical for optical analysis systems, and therefore do not define any patentable distinction between the claims as recited and those of the U. S. patent.

8. Claims 1, 2, 4, 6, 7, 10, 11, 12, 13, 14, 15, 21, 22, 23, and 24 are directed to the same invention as that of claims 1, 2, 3, 4, 5, 8, 9, 10, 11, 12, 15, 22, 23, 24, and 19, respectively of commonly assigned US Patent No. 6,246,062. The issue of priority under 35 U.S.C. 102(g) and possibly 35 U.S.C. 102(f) of this single invention must be resolved.

Since the U.S. Patent and Trademark Office normally will not institute an interference between applications or a patent and an application of common ownership (see MPEP § 2302), the assignee is required to state which entity is the prior inventor of the conflicting subject matter. A terminal disclaimer has no effect in this situation since the basis for refusing more than one patent is priority of invention under 35 U.S.C. 102(f) or (g) and not an extension of monopoly.

Failure to comply with this requirement will result in a holding of abandonment of this application.
